

PERCHLORATE PEER REVIEW WORKSHOP

In order to ensure that this scientific workshop addresses the critical issues related to the toxicity database for ammonium perchlorate and the development of the Toxicological Review document, the following procedures should be followed during the workshop:

- 1) Any registrant who wishes to observe the discussions of the peer reviewers is welcome to stay for the entirety of the workshop.
- 2) Time has been set aside at the meeting for those who have registered to make a presentation. Presentations will be limited to 5 minutes, and will be ordered in accordance with the date of registration.
 - Presentations should only address issues relevant to the toxicity of perchlorate, the quality of the toxicological review document and/or the proposed hazard characterization. Comments should not address chemical/analytical issues, remediation/treatment issues, other risk management issues, or site-specific issues. While these issues are important, they are not the subject of this peer review workshop.
 - No organization is permitted to make more than one presentation.
 - RTI will attempt to accommodate any individuals who wish to make a presentation, but have not registered in advance, however, the time set aside for presentations is limited, and priority will go to those who have registered in advance. Anyone who has not pre-registered but wishes to present oral comments at the meeting should contact a representative of the contractor, at the sign-in area.
 - Persons making presentations may not direct questions to peer reviewers. They may, however, respond to questions raised by the peer reviewers.
- 3) Persons wishing to submit written comments to the peer reviewers at the meeting must give 12 copies of the comments to the designated contractor representative at the sign-in area. That person will distribute the comments to the reviewers. No one is to distribute written materials directly to the peer reviewers. In addition, no materials from interested parties will be distributed to other attendees in the meeting room. Space will be made available outside the meeting room for those who wish to make materials available to the public.
- 4) RTI will maintain a record of all materials submitted prior to, or on the day of the meeting.
- 5) RTI will provide sign-up sheets for meeting observers interested in obtaining copies of the materials submitted by observers for the information and consideration of the peer reviewers, and the workshop final report.
